

1-Week Watering Checklist

Happy House Plants · a tiny printable companion

Don't water on a calendar. Use this sheet to notice what your plants actually need this week. Finger-test first, then tick the day you watered.

Plant / pot	Mon	Tue	Wed	Thu	Fri	Sat	Sun

Quick reminders

Tropicals in a small pot: water when the top 2-3 cm is dry, then soak and drain.

Big monstera: check deeper (about 5 cm).

Snake plant, ZZ, cactus, succulents: wait until the mix is dry most of the way down.

Empty the saucer after 15-20 minutes. Wet feet kill more plants than thirst.

Winter: many plants drink less, but heaters dry the mix faster. Still check; don't guess.
